

The restaurants listed in this directory **care** about your health. That's why each one is **100% Smoke-Free!**

Did You Know?

- The US Surgeon General reports that there is NO safe level of second-hand smoke.
- Secondhand smoke causes premature death and disease in children and adults who do not smoke!
- Smoke lingering in the air around a child can increase the risk of sudden infant death, asthma, upper respiratory infections, ear infections, and slow lung growth.
- In adults, secondhand tobacco smoke increases the risk of heart disease and cancer by 20-30%. This rate is significantly decreased when exposure to second hand smoke is reduced.
- Separating smokers from nonsmokers does not eliminate the risk of second hand smoke exposure.

For information about becoming a smoke-free restaurant, contact **Healthy Cabarrus** at 704-920-1303 or go to www.healthycabarrus.org
